EDUCATION

An Najah National University |2020–current

Bachelor of Science in Computer Engineering

- Programming:
 - Languages: Python, C/C++, Java, and JavaScript.
 - Topics: Data Structures, Algorithms,
 - Digital Logic Design, Microprocessors, and Embedded Systems.
- Networking:
 - TCP/IP, Network Security, and Wireless Communication.
- Databases:
 - SQL, NoSQL, and Database Management Systems.
- Artificial Intelligence & Machine Learning:
 - Topics: Neural Networks, Regression, and Classification.
 - Tools: TensorFlow, Scikit-learn, and PyTorch.
- Operating Systems:
 - Concepts: Process Management, Memory Management, and File Systems.
- Electronics:
 - Circuits, Signal Processing, and Semiconductor Devices.

COURSES

- Online Learning Platforms:
- Completed courses on platforms like:
- Coursera: Specializations in Machine Learning, Data Science, and Algorithms.
- edX: Courses on Computer Architecture and Cybersecurity.
- Udemy: Practical tutorials on Web Development and Mobile App Development.
- Khan Academy: Strengthened fundamentals in Mathematics and Electronics.
- YouTube: Followed creators for quick lessons on coding and hardware systems.

Projects Completed
During
University Courses

During my university studies, I completed a variety of projects across different courses, showcasing my skills in both software and hardware. In web and database courses, I developed an e-commerce website, a library management system, and a distributed database system. For data structures, I implemented a pathfinding visualizer and a custom data structures library. In software engineering, I created a bug tracking system and modular applications using advanced design patterns. For networks, I built a chat application and a network traffic analyzer. In hardware courses, I designed a home automation system, a digital clock, and simulated a CPU pipeline. These projects highlight my ability to apply theoretical knowledge to solve real-world problems across diverse domains.

CERTIFICATES

Hult Prize | 2022 Aptis | 2020
team and project managment English
